

SAVE ENERGY COSTS WITH A WESTBURNE LIGHTING AUDIT

A **Westburne Lighting Audit** can identify improvements that will lower the operating costs of your facility and we will work with you on a retrofit program. We also initiate and manage the **SaveOnEnergy** application for a rebate that can substantially reduce the payback period of your investment. Contact us: lighting@westburne.ca

UPON FINAL APPROVAL Hydro will ask the client to send an invoice to Hydro in order to receive the rebate. Once the invoice is sent, Hydro will issue the payment.

THE PROJECT IS NOW COMPLETE.

*This may require the client's hydro account number, HST number, legal business name, square footage of the facility etc.

** Hydro may want to conduct an audit to confirm the light count before giving a pre-approval.

*** Paperwork may include proof of payment to Westburne or the contractor, recycling receipts, and may involve a post audit by the LDC. We will secure the final rebate for the client.

SAVE ENERGY COSTS WITH A WESTBURNE LIGHTING AUDIT
